

How To Use & Read Properties Files in Selenium

Read A Property File in Java

1. Why do we need to read a property file?
2. what is property file? .properties
3. how to do?

.properties files are mainly used in Java programs to maintain project configuration data, database config, or project settings, etc. Each parameter in properties file is stored as a pair of strings, in key-value pair format, where each key is on one line. You can easily read properties from some file using an object of type Properties. 1

In Selenium, .properties files are mainly used to store GUI locators/elements, and also Global fields like URL, username, password, file path, database configuration details, etc

Property file eke extension eka - .properties

.properties file eke data read kaala api test data widiyata ganawa.

Meka karanan mekama oneda ? .txt jason data walin puluwan . but meka se karanawa configuration details teya ganna use karanwa.

Meka use karanwa URL,username ,passwors file path database configuration details teya ganna.

Test code eke hard code karanne natuwa mekan store karala ganan puluwan.meka wasiya thamai code base eka non technical kenekta dunnoth browser eke hardcode karala dunnath amarui neh. Me file eke dammoth eyata keyana puluwan neh ethana wetahrak change karanan keyala.

Me file eke data stire karanne key value pair ekan

Key = value

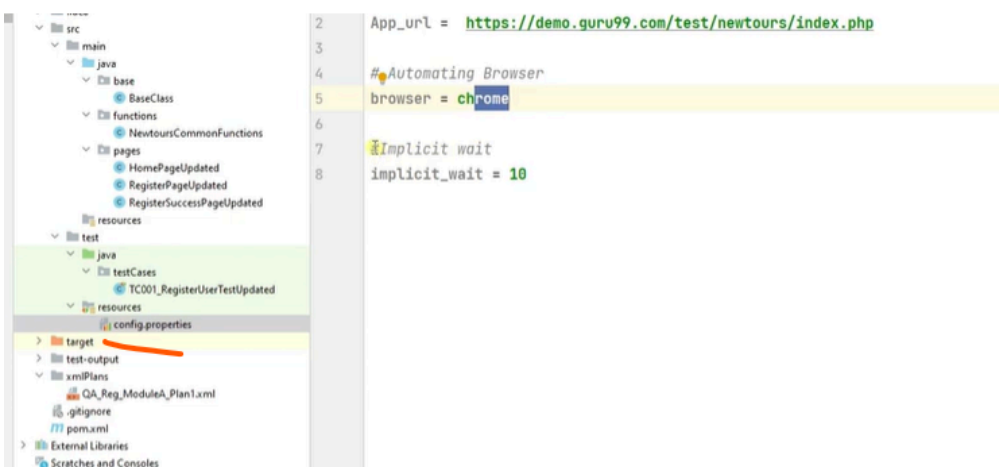

Ethkota test layer eke pass karanan ona key eka neh

Ona thana me file eka hadanna puluwan .but standard eka

Test - java - resources - file ekak hadnana - config.properties

Meka normal notepad file eka nawe properties file ekak.

Commnet karanne - #

Dan base class eke

Config.properties file ekan data read karana code eka liyanna

excel file ekan data read karanna api use kare - FileInputStream

File **identify** karanna onanam - **File**

File eka **data read** karanna onanam - **FileInputStream**

File ekata **data input** karanan onanam - **FileOutputStream**

FileInputStream object eka tharaka me file eka. Path eka dammaoth meka kata hari share karana path eka waradinawa neh . eka nisa root folder eke edala danna.

Root folder eka identity karanna puluwan - ("user.dir" + "src\\test\\resources\\config.properties") danna

Eke error ekak enawa . exception handel karanna.

Ethakota method ekata throw karanwa openpage() throw FileNotFoundException.mekan wanan file eka hoya ganani bari unoth meka throw karanna.

Dan apu file location eka gaththa neh .

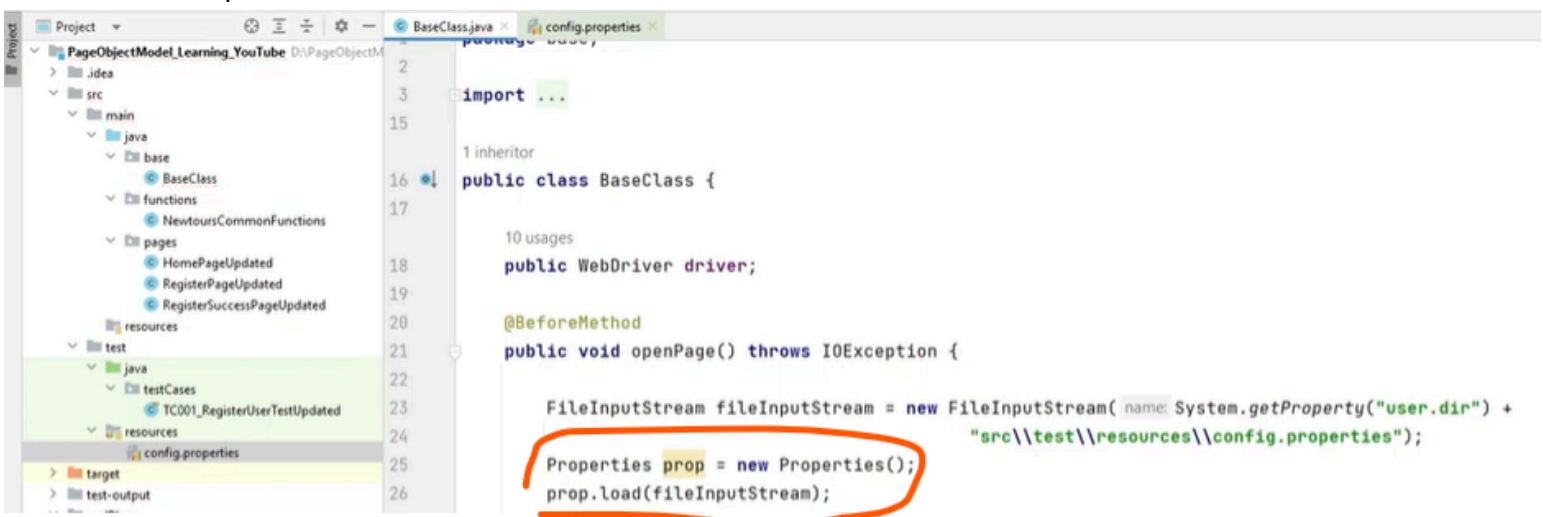

Dan properties file ekan neh data read karanna ekata apita properties keyala class ekak teyenawa java wala (java util eke) ekan object ekak hadanna

Eke load keyala method ekak teyenwa .

Mama load karanan keyanwa file location eka .

Api capture karapu file eka apit fileinputstream eka store kara, eka pass karanna

Ekath throw exception eka throw karanan - override una ioexecution ekan

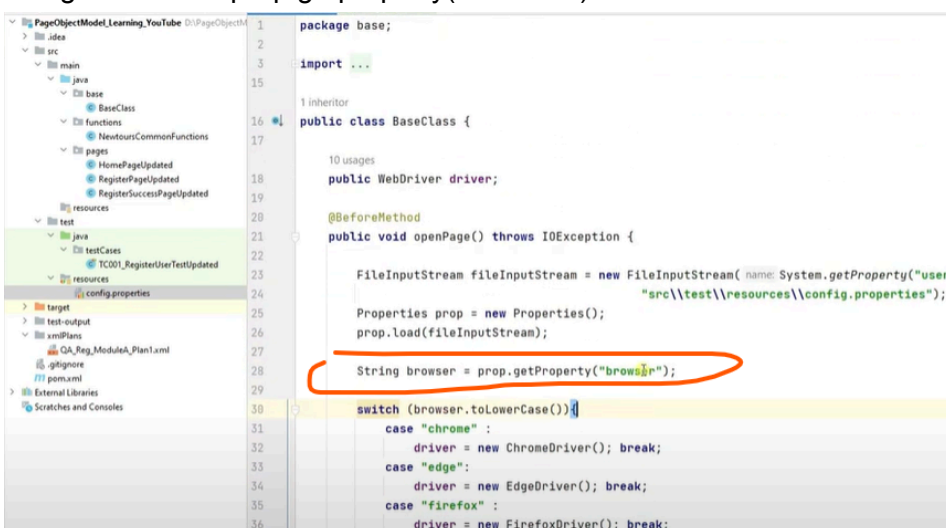

Api dan properties file eka load karala ewarai. Dan teyanne file eka read karanna

Ekata prop keyana eka use karala getpropety method eka use karala key eka pass karanan teyanne.

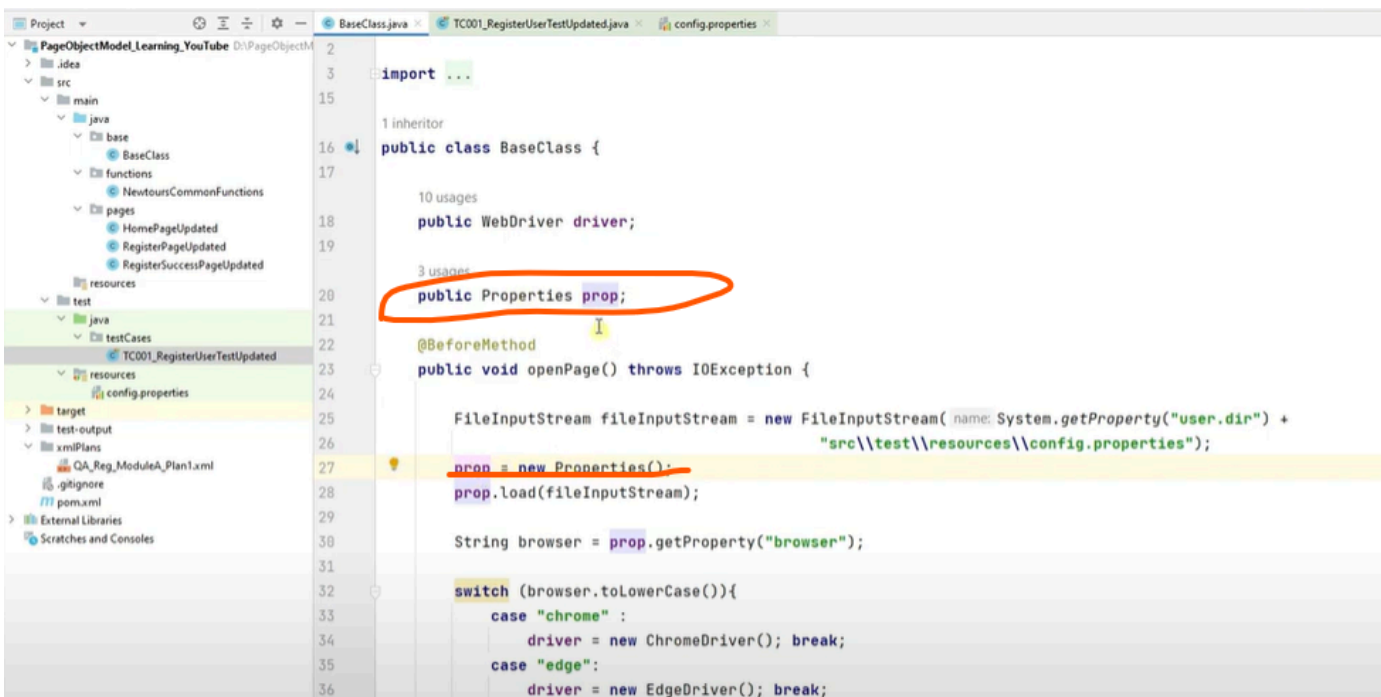

get priory eka keyana eka return karanne string . dan apita panne nati unata prop.getProperty eka store wela teyanne string value ekak. Api eka string ekaka store karanna.

String browser = prop.getProperty("browser")

Base class ekata wetharak name me file eka use karanna puluwan.

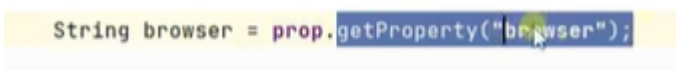

Api hama tc ekama me kamame baseclass eka extend karala teya ganawanwa neh . eka nisa me file eke teyanan hama detail ekakma enawa tc class(child) ekata.
 Ekata api base class ekata geheh me prop keyana eka class level teya gannawa.public danan ona thanak da ganah .

```

1  import ...
2
3  1 inheritor
4
5  public class BaseClass {

29
30
31
32
33
34
35
36
  
```

Public properties prop; meka null teyanne @BeforeMethod eka call unata passe mekata power ekak enawa.
 New properties keyana object haduwata pass power ekak enawa.
 Ethkoata me power eka himi una Public properties prop; ona thanaka use karanna puluwan.
 read karanne kohomada -

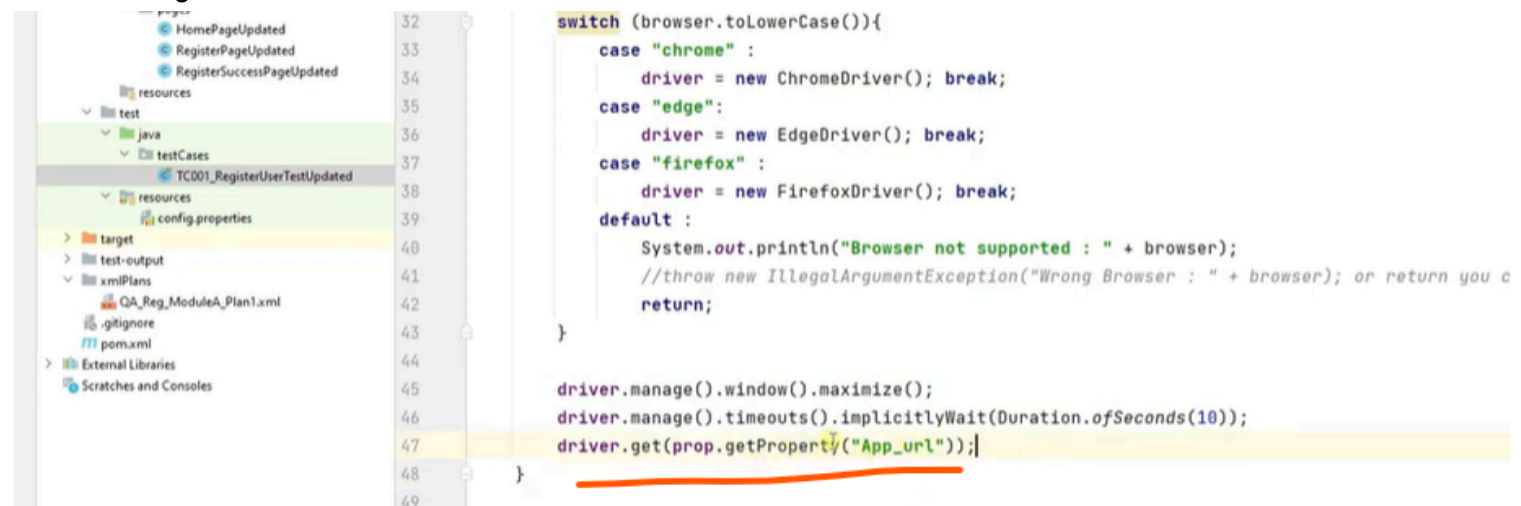

```

String browser = prop.getProperty("browser");
  
```

Adala key eka danna.eka string ekak store karanna. Anewaranma string eke thamai store karanna wanne . mokada
 getproperty return karanne string

Dan URI eka gamu

```

32     switch (browser.toLowerCase()){
33         case "chrome" :
34             driver = new ChromeDriver(); break;
35         case "edge":
36             driver = new EdgeDriver(); break;
37         case "firefox" :
38             driver = new FirefoxDriver(); break;
39         default :
40             System.out.println("Browser not supported : " + browser);
41             //throw new IllegalArgumentException("Wrong Browser : " + browser); or return you c
42             return;
43     }
44
45     driver.manage().window().maximize();
46     driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(10));
47     driver.get(prop.getProperty("App_url"));
48 }
49
  
```

Getproperty accept karanne string

Ofsecond accept karanen long

Meka convert karala danna ona

prop.getProperty ("Implicit wait") meka assing karanawa string implicitwait keyala variable ekakata.meka dan long variable ekak karanna ona.

Eka long imp_wait_log keyala variable ekakata da ganna ona

Eka covert karanne

Long.parseLong(iml_wait) - Long keyala warapping class ekak teyanwa. Eka teyanwa parselong keyala method ekak. Eka
 Adala ekata long variable ekak pass karanwa . eka eya long ekak widiyata covert karala danwa .

Eka pass karanwa ofsecond(imp_wait_long) keyana thanata

```
34  
35  
36  
37  
38  
39  
40  
41  
42  
43  
44  
45  
46 driver.manage().window().maximize();  
47 String iml_wait = prop.getProperty("implicit_wait");  
48 long imp_wait_long = Long.parseLong(impl_wait);  
49 driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(imp_wait_long));  
50 driver.get(prop.getProperty("App_url"));  
51  
52  
53 @AfterMethod  
54 public void closeBrowser(){  
55     driver.quit();  
56 }
```

Me karapu teka 1 line karanna puluwan

```
driver.manage().window().maximize();  
driver.manage().timeouts().implicitlyWait(Duration.ofSeconds(Long.parseLong(prop.getProperty("implicit_wait"))));  
driver.get(prop.getProperty("App_url"));  
}
```

Mulu project ekatama eka property file ekak athida ?

Na testcase level ewa wenama danna ona

Ekata api **SRC - MAIN-JAVA eke utilites keyala folder** ekak hadanawa.

Eka java class ekak hadanawa .propertyfileReader keyala.

```
1 package utility;  
2  
3 no usages  
4 public class PropertyFileReader {  
5  
6  
7 }  
8
```

Me class eka athule method liyanwa . e method eka haraha apita puluwan resource folder eka yatathe apita ona tharam resource folders hada ganna.property file 50 te bunath adala file ekan adala value eka read karanna puluwan widiyata hada ganan puluwan.

Testcase wala hard code karanna natuwa property file ek teya ganan puluwan.

Hard code data teya ganan puluwan ekama widiya nawe property file keyanan . excel walath teya ganan puluwan.enum class eka teya gannath puluwan

propertyFileReader eke method ekak hadanawa. Eke fileInputStream eka danwa . ethaklta error ekek denawa . eka suggest karana throw eka danan epa . ethkota eya call wena hama thama throw karanna wenawa. Eka nisa more options gehen try catch ekak danna.

File eka digai wagenam eka file class ekan object ekak hadala eka danna.

```

no usages
public class PropertyFileReader {

    no usages
